

3.14 Prouvons que suite $(u_n)_{n \in \mathbb{N}}$ définie par $u_n = \frac{1}{n}$ converge vers 0.

Soit $\varepsilon > 0$. Choisissons $n_0 \in \mathbb{N}$ avec $n_0 > \frac{1}{\varepsilon}$. Alors pour tout $n \geq n_0$, on a que

$$|u_n - 0| = \left| \frac{1}{n} - 0 \right| = \left| \frac{1}{n} \right| = \frac{1}{n} \leq \frac{1}{n_0} < \varepsilon.$$

On a ainsi montré que $\lim_{n \rightarrow +\infty} \frac{1}{n} = 0$.
